

**Supports absorption
of dietary
calcium/phosphorus**

**Assists healthy
bone and shell
formation**

D3 Active

A complementary liquid feedstuff designed to help aid calcium absorption and metabolism and to assist with the growth of normal bones and shells.

**Vitamin D3
Calcium pidolate**

Objectives:

- Development of strong bones and shell.
- Support absorption of dietary calcium and phosphorus.
- Reduce financial loss due to carcass/egg downgrading.
- Maintain bird welfare.

Product Indications:

- Incidence of leg culls or factory rejects.
- Reduced movement.
- Shell cracks or reduced quality.

Technical Interest:

Strong bones: Fast growing birds require adequate support to maintain feeding, active behaviour, health and welfare. A strong bone structure, particularly legs can increase mobility resulting in positive feeding along with welfare affects, supporting performance.

Shell weakness: Point of lay, optimum lay, and later lay persistence rely on ensuring correct balance of calcium and phosphorus. Adequate absorption and metabolism must be maintained to help minimise hairline cracks, broken shells or rejects. Provision of good shell quality also assists hatchability of chicks.

For Poultry

A complementary liquid feedstuff designed to help aid calcium absorption and metabolism and to assist with the growth of normal bones and shells.

Benefits:

- The ingredients in **D3 Active** help to improve absorption and metabolism of calcium.
- **D3 Active** can contribute to improved shell thickness and strength during periods of nutritional stress in laying or breeding flocks.

D3 Active

When to apply:

✓
0-3 days of age:
Use 250ml per 1000 litres clean drinking water
(Broilers)

✓
10-14 days of age:
Use 250ml per 1000 litres clean drinking water
(Broilers)

✓
28-31 days of age:
Use 250ml per 1000 litres clean drinking water
(Broilers)

✓
Use 100ml per 1000 litres clean drinking water
(Layers)

Application:

Add 100-250ml of **D3 Active** liquid to 1,000 litres of clean drinking water. Ensure Dosatron™ stock solution is calibrated for appropriate uptake. No manual stirring is required. Product can be used as standard management practice or during individual cycle cases of digestive stress according to the discretion of the farm manager. To maintain drinking lines and water quality, any water application should be followed with a suitable 1:50,000 dilution of sanitiser.

Storage:

Store in cool and dry place away from direct light. Keep away from children.

Shelf Life: 24 months from date of manufacturing.

Pack Size: 5L Jerrycan & 1L Bottle.
