and development**

**Skeletal and
shell health**

**Natural immune
support**

**Gut health
support**

WholeVit P

A complementary liquid feedstuff for poultry to containing a specific blend of supporting natural antioxidants and natural fibres.

**Comprehensive vitamin specification
(A, B, E & K)
Vitamin D3
Proviox polyphenols
Soluble prebiotic fibre source**

Objectives:

- Help to provide vital vitamins helping support growth.
- Aid normal immune function during challenge.
- Support optimum performance.

Product Indications:

- Reduced feed intake.
- Vaccination.
- Feed change.

Technical Interest:

Poor vitamin availability: Feed is expertly formulated to supply nutrients for optimum growth under normal conditions. Unpredictable variations in feed intake or growth may increase the need for additional vitamins.

Support growth and normal immune function: Intensive production generates metabolic and physiological stress, increasing the production of free radicals. To help ensure valuable nutrients are utilised for growth, free radicals can be minimised by the action of antioxidants.

Gut health: The gut must develop quickly to effectively process nutrients for long term benefits. A healthy gut supports the development of favourable flora for optimum digestion and health.

For Poultry

A complementary feedstuff for poultry containing a blend of electrolytes, Vitamin B2 and flavours. Designed for strategic use to optimise water consumption and supply essential body salts.

Benefits:

- Cost effective application.
- Farm manager confidence during stress or reduced feed intake that all vital vitamins supplemented.
- Support antioxidant status to aid normal immune function.
- Flexible, cost effective supplementation.

WholeVit P

When to apply:

✓
1-2 days
during the
first 5 days

✓
2-3 days
during periods
of challenge

✓
2-3 days
following
vaccination
or antibiotic
application

✓
2 days on
2 days off
at times of
maximum growth
or productivity

WholeVit P

Application:

Add 375ml of **WholeVit P** liquid to 1000 litres of clean drinking water. Ensure Dosatron™ stock solution is calibrated for appropriate uptake. No manual stirring is required. Product can be used as standard management practice or during individual cycle cases of chick challenge at strategic times according to the discretion of the farm manager. To maintain drinking lines and water quality, any water application should be followed with a suitable 1:50,000 dilution sanitiser.

Storage:

Store in cool and dry place away from direct light. Keep away from children.

Shelf Life: 24 months from date of manufacturing.

Pack Size: 5L Jerrycan & 1L Bottle.
